RE: Encroachment of building into public easement

Dear Tressa;

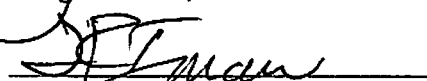

After our meeting of January 29, 2009, Surveyor George Marshall was utilized by the county to survey the area of the Victor Park located in downtown Victor. It was determined that at least one half of the existing pavilion building is located within the easement. If the Garden Club plans to add onto the pavilion, the Commissioners request the pavilion be moved out of the public easement and into the Victor Park property. If you chose not to add on to the pavilion, the Commissioners will allow this encroachment to exist until we find it necessary and prudent to have you remove the encroachment.

Your efforts to provide Victor with a community park and various activities are certainly appreciated and welcomed by us. Thank you and the dedicated volunteers who make our community a better place to live.

Sincerely,

Carlotta Grandstaff, Chairman
